revenue recognition principle definition. The accounting guideline requiring that revenues be shown on the income statement in the period in which they are earned, not in the period when the cash is collected.

revenue recognition principle definition and meaning

The revenue recognition principle is a cornerstone of accrual accounting together with the matching principle. They both determine the accounting period, in which revenues and expenses are recognized. According to the principle, revenues are recognized when they are realized or realizable, and are earned (usually when goods are transferred or services rendered), no matter when cash is received.

A fingerprint in its narrow sense is an impression left by the friction ridges of a human finger. The recovery of fingerprints from a crime scene is an important method of forensic science. Fingerprints are easily deposited on suitable surfaces (such as glass or metal or polished stone) by the natural secretions of sweat from the eccrine glands that are present in epidermal ridges.
