Biometrics : Electromagnetics : Science + Technology

Biometrics is the technical term for body measurements and calculations. It refers to metrics related to human characteristics. Biometrics authentication (or realistic authentication) is used in computer science as a form of identification and access control. It is also used to identify individuals in groups that are under surveillance.. Biometric identifiers are the distinctive, measurable ...

A fingerprint in its narrow sense is an impression left by the friction ridges of a human finger. The recovery of fingerprints from a crime scene is an important method of forensic science. Fingerprints are easily deposited on suitable surfaces (such as glass or metal or polished stone) by the natural secretions of sweat from the eccrine glands that are present in epidermal ridges.

The article is structured in five sections. Section 2 describes classical cattle identification methods, emphasizing their performance and drawbacks. Section 3 sheds light on biometrics technology, and presents an overview of biometric-based identification systems. Section 3 covers cattle biometrics with respect to muzzle print images, iris patterns, and retinal vascular patterns.
