Security Features in Teradata Database EB-1895 > 1007 > PAGE 2 OF 13 Executive Summary The Teradata® Database supports many important features that are designed to enhance the security of an enterprise

Security Features in Teradata Database

Teradata Corporation is a provider of database and analytics-related products and services. The company was formed in 1979 in Brentwood, California, as a collaboration between researchers at Caltech and Citibank's advanced technology group. The company was acquired by NCR Corporation in 1991, and subsequently spun-off again as an independent public company on October 1, 2007.

SQL Data Manipulation Language - tunweb.teradata.ws

A database is an organized collection of data, generally stored and accessed electronically from a computer system. Where databases are more complex they are often developed using formal design and modeling techniques. The database management system (DBMS) is the software that interacts with end users, applications, and the database itself to capture and analyze the data.
