Dual inheritance theory (DIT), also known as gene-culture coevolution or biocultural evolution, was developed in the 1960s through early 1980s to explain how human behavior is a product of two different and interacting evolutionary processes: genetic evolution and cultural evolution. Genes and culture continually interact in a feedback loop, changes in genes can lead to changes in culture ...

S/Z, published in 1970, is Roland Barthes's structural analysis of "Sarrasine", the short story by Honoré de Balzac. Barthes methodically moves through the text of the story, denoting where and how different codes of meaning function. Barthes's study has had a major impact on literary criticism and is historically located at the crossroads of structuralism and post-structuralism

This study contributes to understanding the role of financial development on economic growth theoretically

and empirically. In the theoretical part of the paper, by developing a Solow–Swan growth model augmented with financial markets in the tradition of Wu, Hou, and Cheng (2010), we show that debt from credit markets and equity from stock markets are two long run determinants of GDP per capita.
