I have an existing form in PDF format that was originally intended to be printed out and completed by hand. I'd like to populate the PDF form dynamically from my ASP.NET application with information from a web form that the user submits so that the user will not have to complete the information by hand.

Search and replace PDF text programmatically from VB.NET

xBase is the generic term for all programming languages that derive from the original dBASE (Ashton-Tate) programming language and database formats. These are sometimes informally known as dBASE "clones". While there was a non-commercial predecessor to the Ashton-Tate product (Vulcan written by Wayne Ratliff), most clones are based on Ashton-Tate's 1986 dBASE III+ release "™" scripts written in ...

Single instruction, multiple data (SIMD) is a class of parallel computers in Flynn's taxonomy.It describes

computers with multiple processing elements that perform the same operation on multiple data points simultaneously. Such machines exploit data level parallelism, but not concurrency: there are simultaneous (parallel) computations, but only a single process (instruction) at a given moment.

SIMD - Wikipedia
